Objective

Motivated Full-Stack Developer with hands-on experience in React Native, Next.js, Supabase, and MetaFox, seeking to leverage technical skills in building scalable web and mobile applications while contributing to innovative projects and continuous professional growth.

Experience

- Echo it solution** March 2026 - Current
Junior software Engineer
Worked as a Full-Stack Developer at EchoIT Solutions, contributing to the development of web and mobile applications. Responsibilities included building cross-platform mobile apps using React Native, developing admin dashboards with Next.js, and integrating backend services using Supabase. Actively involved in designing APIs, managing databases, implementing authentication, and creating responsive user interfaces using Tailwind CSS.
Also worked on the MetaFox platform, where responsibilities included creating and customizing product modules, implementing backend logic, configuring database structures, and extending existing features based on project requirements. Collaborated closely with designers, backend teams, and project managers to deliver scalable, secure, and high-quality solutions while following best coding practices and agile workflows.
- Echo it solution** June 2025 - February 2026
Internship

Languages, Frameworks And Tools

- Languages: Python, TypeScript, HTML5, CSS3, SQL

Frameworks & Libraries
React Native, Next.js, React.js, Tailwind CSS, MetaFox Framework, Node.js

Backend & Tools:
Fastapi, Supabase, REST APIs, Git & GitHub

Projects

- NexusMindAi**
NexusMind AI — AI-powered analytics SaaS that transforms business documents and datasets into actionable insights using AI agents, RAG, and automated reporting. Built with Next.js, TypeScript, FastAPI, PostgreSQL, SQLAlchemy, and LangChain/LangGraph. Implemented multi-format file ingestion (Excel, CSV, PDF, DOCX, PPTX), document processing and vector search, Business Analyst, Recommendation, and Executive Report agents, interactive analytics, and versioned Living Reports with provider/model selection.
- Pitalam**
Developed and enhanced the full-stack e-commerce platform using Next.js, React, FastAPI, PostgreSQL, SQLAlchemy, and Docker. Built and maintained product, category, SEO, and admin management features, including product metadata, slugs, images, Best Seller flags, ASINs, and external purchase links.
Integrated Amazon SP-API for importing and synchronizing existing Amazon products with PITALAM, including product details, pricing, and images while preventing duplicate product creation.
Developed AI-powered product workflows using LangGraph and OpenRouter to process product images/data and generate structured product information and Amazon draft data.
Implemented and debugged Dockerized production deployment, API configuration, database migrations, authentication, and scheduled Amazon synchronization jobs.
Improved storefront behavior and SEO, including robots configuration, HTTPS, image handling, and search-friendly product/category URLs.
